*Electron microscopy of frozen
hydrated biological specimens.*
J. Ultrastruct. Res., 1976.
55(3): p. 448-56.

1978 EMBL

(European Molecular Biology Laboratory)

A Project:

How to deal with water in cryo-electron microscopy?

A Problem

Ice is not like
liquid water

High Tech

Ice at EMBL

High Tech

Vitreous Water

Alasdair McDowall

The “vitrification” man

This was the first *Aha!*

The trouble with
vitreous water
is that vitrification
should be impossible

Farther
Basile
Luyet

Founder of
cryobiology

Luyet, B. J., & Gehenio, P. M.
(1940). *Life and death at low
temperature*. Normandy,
Missouri: Biodynamica.

Savièse

« You can't bend Nature »

Mayer, E. and P. Brüggeller. 1980. "Complete vitrification in pure liquid water and dilute aqueous solutions." *Nature* 288:569-571.

Dubochet, J., & McDowell, A. W. (1981). Vitrification of pure water for electron microscopy. *J. Microscopy*, 124, RP3-RP4.

Conclusion I

*Vitreous water is not
what we thought ...*

*... but it works so well
for cryo-electron microscopy!*

Conclusion II

What is water ?

Wait to know more

The second *Aha!*

The Power of Knowledge

From Scarcity to Excess

Science without conscience
is but the ruin of the soul!

François Rabelais 1532

Coming out of the Ivory tower

A curriculum: Biology and Society

To ensure that our students turn out to be
as good citizens
as they are good biologists

How can we be as good in
using knowledge
for the well-being of all
as we are in producing it?

Imagine . . .

Imagine . . .

You may say I'm a dreamer
But I'm not the only one
I hope some day you'll join us
And the world will live as one

John Lennon

Thank-you
